Skills

OS
GNU/Linux, Windows

LANGUAGES
C/C++, Python, javascript, bash scripting

FRAMEWORK
Flask, Node.js,
Tensorflow, Pytorch, scikit-learn, keras

DATABASES
MySQL, PostgreSQL, MongoDB

OTHERS
Markdown, Git, Vim,
Sublime Text, VS Code
FL Studio, Audacity,
kaldi, speechbrain,
wavesurfer, bash

Coursework

Data Structures and Algorithms
Linear Algebra, Data and Analysis
Discrete Mathematics
MySQL, Computational Linguistics
Advance NLP, Speech Analysis
Speech-to-Speech Machine Translation
Operating Systems and Networks

Education

2020-2024
B.TECH. IN CSE
IIIT Hyderabad
CGPA : 7.53/10

2018-2020
INTERMEDIATE
KPC Junior College, Kharghar
Percentage: 81.3%

2017-2018
HIGH SCHOOL
DAV International, Kharghar
Percentage: 94.8%

IIIT Hyderabad, Gachibowli

Projects

2023-NOW **Stylr** **Python Dev, Computer Vision, Web Dev, ML**
A fashion-apparel shopping app that recommends clothes taking your current wardrobe into account, with a swiping interface inspired by tinder. App made with MERN stack and model was hosted on heroku. The Apparel Recognition Model (AppReMo) recognises the input apparel type and color, trained on Flipkart 500,000 items dataset.

2023-NOW **Digit Recognition** **Deep Learning, Speech Processing, Python**
- Automatic Speech Recognition (ASR) system to recognise the numerals from its spoken utterance in English. The model takes a sequence of numerals as an input and outputs 5-8s of spoken utterance of the numerals
- Machine Translation (MT) system to translate the numerals from English to Hindi language in a textual format.
- Text-To-Speech (TTS) system to pronounce the numerals as an utterance in Hindi language. The translated sequence of Hindi numerals are transformed into spoken utterances in a 5-7s window.

2020-NOW **Small Projects** **Data Analysis, Software Systems, OOPS**
CANTEEN PORTAL
- A MERN stack project to track real time activity of orders placed in the portal
LSTM BLOGS
- Hosted a series of blogs on the history, training, evaluation and comparison of different Deep Neural Networks, focusing on LSTMs and RNNs
C SHELL, XV6 SHELL
- Modified and created different system calls to support and enhance the usability of bash shell. Created various syscalls to implement proc scheduling and networking for Xv6 operating system
CLASH OF CLANS BASH GAME
- Created a bash-based game inspired from the popular Clash of Clans, with Town Hall, Turrets, Barbarians, Archers, Leviathan Sword
WSD (WORD SENSE DISAMBIGUATION)
- Created a word sense disambiguation model trained on 700,000 Hindi sentences, using IndiWordNet for different word senses
STYLE TRANSFER
- Implemented and replicated the results of the paper - Text Detoxification using Large Pre-trained Neural Models

Experience

2022- MON SEM **Teaching Assistant x 3**
Teaching Assistant for the courses Language and Society, Introduction to Linguistics and Speech Analysis

DEC'23 - NOW **DL Intern - Proxzar**
Designed a Visual Search engine wherein you upload an image of a product and get back the most similar products from the catalog
