CAREER OBJECTIVE

I'm looking forward to a position in Quality Assurance with Automation Testing to develop my career as a Software Quality Engineer which will utilize my Technical skills, Quality thoughts, Innovative ideas, and Non-Technical skills towards the mutual development of an Organization and Myself.

PROFESSIONAL SUMMARY:

- 2 years of experience in Software Testing including Manual as well as Automation
- Creating Test Plans, Test Cases, Test Scenarios, Test Scripts, Test Logs, Traceability Matrices
- Strong knowledge of SDLC, STLC,), Bug Life Cycle, and Testing Methodologies (Agile Model)
- Experience in automation testing with Selenium
- Utilize knowledge of Java to create automation test scripts
- Good knowledge of SQL
- Experience in performing Smoke, GUI, Black box, Functionality, Regression, Compatibility, Performance, Load, User Acceptance Testing
- Reporting and tracking defects to closure
- Team Player also capable of working independently with minimal direction
- Experience in designing test cases based on Test Case Design Techniques and Business Requirements
- Experience in writing SQL Queries

Education

- Bachelor Of Technology in Computer Science Engineering at Gitam University Hyderabad.

Experience:

Currently working as Automation test engineer at Prodapt Solutions pvt .Ltd.

PROFESSIONAL EXPERIENCE

Project #1(Online Banking System)

Title : Internet Banking System

Client : M&T Bank

Technologies: HTML, Java, Java Script

Data Base: SQL Server

Role : Test Engineer

- **Description :**

The Internet banking system is an online Banking System, which helps customers to make online transactions. This banking system contains two types of transactions. They are customer Transactions and bank transactions. In this banking system, the user enters his customer id and password. Then it will display the list of transactions like balance inquiry, transaction inquiry, Transfer money from one account to another account, fixed deposit position, fixed deposit renewal, and cheque status. Involved in the testing of all six modules.

Responsibilities:

- Understanding business requirements.
- Updating Framework functions when needed
- Developed the Automation Test Scripts
- Execution of test scripts using Selenium.
- Performed Functional and System testing
- Reporting and tracking bugs in Mantis
- Reviewing the Test Reports and Preparing Test Summary Report.
- Performed functional, compatibility and regression testing, sanity testing.
- Participated in identifying the Test scenarios and designing the Test cases.
- Prepared and Executed Test Cases as per System Requirements.
- Automating of all the static, dynamic objects in page i.e. links, images, text, date and image with link
- Performed regression testing on the modified Buildarious black box testing Methodologies Like functional testing and Regression Testing.
- Involved in automation testing.
- Involved in test scripts preparation and execution within the framework using Selenium WebDriver.

PROJECT#`

Title: Pharmacy Management System.

Client: QUALITEST

Technologies: Visual Basic 6.0, Python, Selenium

Data Base: SQL

Role : Test Engineer

Description:

The 'Pharmacy Management System' aims at providing a computerized system for maintaining the transactions of medical distributors. The aim of the 'Pharmacy Management system' is to provide a user-friendly interface, which can be easily dealt with by people who do not have much knowledge of computers. The interface is provided with relevant controls and names right from the login screen to the report generation screen.

Basically, four modules are present in this project. They are Purchasing order

Drug Sales

Maintaining stock

Generation of Reports

Responsibilities:

- Understanding the client requirements and project functionalities.
- Prepared Test plans, Test Cases, and testing scenarios Install the application and configure the application.
- Mapping requirements with test cases.
- Involved in Automation Infrastructure Development using Selenium.
- Created Test cases Using Element locators and Selenium Webdriver methods.
- Execution of Selenium Test cases and Reporting defects.
- Involved in Regression Testing using Selenium
- Enhancing the Selenium Test cases for Cross browser testing.
- Preparing Defect Reports and assigning the defects to the developer
- Involved in Functional, Regression testing.
- Executing test cases and preparing daily execution reports.
- Defect logging and tracking.
- Providing adequate support to the developers for defect analysis.
- Performed Functional, Integration, Regression, Negative, and System Testing.
- Performance testing by ETL process.

TECHNICAL SKILLS:

- Operating Systems: Windows XP/7 /8
- Languages : Core JAVA,HTML,CSS,SQL.
- Test Case Management Tools : Test link , HPQC
- Database : MySQL
- Automation Tools : Selenium 2.0
- Frameworks : TestNG, JUnit
- Testing Methodologies : Agile
- Tools :Sikuli,AutoIT,SOAPUI

PERSONAL INFORMATION

Date of Birth : 24- 11-2000
Nationality : India
Gender : Female
Languages Known : English,Telugu,Hindi
Present Address : Hyderabad
