

SWAPNIL LAHAMGE

Data Analytics

An IT experience in historic data and apply statistical concepts to make cross-sectional predictions. Predictive analytics uses many techniques from data mining, statistics, modelling, machine learning, deep learning ,NLP and artificial intelligence to analyse current data to make predictions about future.

Profesional Experience

ML Project Associate | Honeywell, Pune

3 Years | June 2020 to Present Date

- A professional with experience in Python, Data Science and Machine learning with expertise in Financial and Healthcare domain projects.
- Able to investigate Data Visualization and summarization techniques conveying key findings.
- Ability to write a clean and production code with Object Oriented Programming in Python.
- Experience in Web Framework Flask
- Thorough understanding of Probability and Statistics, Bayesian methods, Time Series analysis.
- Experience in data management tools - Relational and SQL databases.
- Knowledge of Python's Data Analysis and Machine Learning Libraries.
- Source code management and Version Control system using Git and GitHub.
- Strong communication and interpersonal skills. Ability to interact with customers with ease and professionalism.
- Languages: Python.
- Cloud Platforms/Services: Google Cloud Platform (GCP), AWS, Azure.
- Web stack: Flask.
- Operating Systems: Linux, Windows.
- Database: SQLite
- DEEP LEARNING:Neural Networks, Deep Learning, ANN, CNN, DNN, Transfer Learning, Back Propagation, Linear Algebra, Activation & loss functions, optimisers, Tensorflow 2.x, Keras,
- AWS: Elastic Compute Cloud, Sagemaker, Notebook instance, AWS container, Simple Storage Services S3, Deployment, Multi cloud environment
- NLP: Text understanding, representation & classification techniques, Text clustering skills Libraries: nltk, spacy, gensim, textblob, langdetect, googletrans Techstat: BOW, TFIDF, word2vec, doc2vec, sent2vec, keyphrase extractio
- Databases: 3C(Command, Constrains, Clauses), CRUD operations, Subqueries, Window functions, Joins
- Another Tool: Docker

• Project Details

Project 1: FLD (ML Project)

Domain: Banking

Description: This project is to help financial industry or bank to collect all the information of a customer in a place ,So that bank will easily identify which customer is applicable for loan or not.

Role and Responsibility:

- Understand, analyze, and interpret large datasets
- Develop advanced programs to extract the data needed, prepare data for further analysis

Discover, design, and develop analytical methods to support novel approaches of data and information processing

- Perform analysis to assess the quality of the data, determine the meaning of the data, and provide data facts and insights.

Address

Pune,Maharastra

Education

BE 2019

Pune University

Expertise

• Machine learning:

Linear Regression, Ridge & Lasso Regression, Logistic Regression, Naïve Bayes Classifier, k Nearest Neighbor's Classifier, Support Vector Machine, Decision Tree, Random Forest, Gradient Descent, Ada-Boost, Gradient Boosting, XGBoost, K-means Clustering.

• Python/ML Packages:

NumPy, Pandas, Sci-py, Scikit-learn, Seaborn, Matplotlib, Flask.

Language

- English
- Hindi
- Marthi

Visualization tool

- Power Bi
- Tableau

Other tool

- Django
- Html
- Flask
- Java
- Python

Project 2: Etrack

Domain:Banking

Description: The Purpose of this project is an extracting a meaningful insight from given Documents for loan approval documents.

Role and Responsibility:

- To create and construct methods and plans for Data collection .
- Unstructured data store in the classify in folder .
- Analysis of Data and insights.
- Data a lots of security.

Project 3: RSPro (Deep Learning)

Domain:Ecommerce

Description: Put down the cloth design image box return same multiple cloth design image

Role and Responsibility:

- creating project data needs, and gathering, categorizing, examining, and cleaning data.
- They are also involved in modeling activities such as training deep learning models, developing evaluation measures, and searching for model hyperparameters.
