

Sandeep vaggu

Software test engineer

✉ sandeepadmashali01@gmail.com 📞 9515804892 📍 Hyderabad India

PROFESSIONAL SUMMARY

Experienced in manual testing with a robust skill set in test case execution, defect identification, and bug reporting. Proficient in designing comprehensive test cases aligned with requirements and user stories. Skilled in utilizing bug tracking tools like Jira for efficient defect management. Possesses knowledge of diverse testing techniques including black-box, white-box, and regression testing. Strong ability to create detailed test documentation such as test scenarios, cases, and summary reports.

PROFESSIONAL EXPERIENCE

Manual test engineer

I native tech solutions pvt Ltd

06/2023 – present

Hyderabad, India

1. Proficient in executing test cases, identifying defects, and reporting bugs effectively.
2. Experienced in creating comprehensive test cases based on requirements and user stories.
3. Familiarity with bug tracking tools such as Jira, for logging and managing defects.
4. Knowledge of various testing techniques like black-box testing, white-box testing, and regression testing.
5. Ability to create test scenarios, test cases, and test summary reports.
6. Keen eye for detail to ensure thorough testing coverage and accurate defect reporting.
7. Conducting product testing after its presentation testing and analysing the results

EDUCATION

Bachelor of Technology

Malilla Reddy institute of engineering & technology

2017 – 02/2022

Hyderabad, India

Intermediate

Ushodaya junior college

2015 – 2017

Bodhan, India

SSC

ZPHS bachepally high school

2014 – 2015

Bachepally, India

SKILLS

Manual testing

- Understanding of software development life cycles (SDLC)
- Knowledge of testing principles and methodologies
- Familiarity with testing types (black box, white box, gray box)
- Creating test plans and test cases
- Developing test scripts and test data
- Understanding of test coverage and risk analysis
- Identifying and reporting defects
- Using defect tracking tools (JIRA)
- Understanding of defect life cycles and prioritisation

Selenium

Selenium Webdriver API, Testing Framework Preferably TestNG or JUnit, Knowledge of Frameworks, KeywordDriven, DataDriven and Hybrid.

SQL

Basic SQL syntax, Conditional filters, Sub queries, Joins

JAVA

OOPS, Understanding the Java Ecosystem, Java Libraries, Java Keywords, Exception handling

JIRA

Load Runner

Creating scripts to simulate user interactions and transactions.

Creating realistic scenarios to simulate real-world usage

Interpreting and presenting performance test results.

Testing web services using LoadRunner's Web Services protocol.

Testing mobile applications using LoadRunner's Mobile protocol.

JMeter

Good Communication & analytical skills

PROJECTS

The home mart

07/2023 – present

The Home mart is a e commerce project its enables users to buy and sell goods online.

As a manual test engineer, I worked on an e-commerce project that involved testing a web-based application that enables users to buy and sell goods online. My testing scope included user registration, product catalog, shopping cart, payment processing, order management, search and filtering, user profile management, security, and mobile compatibility. I ensured that the application was thoroughly tested to provide a seamless user experience, accurate order processing, and secure transactions.

ACHIVEMENTS

- Successfully identified and reported critical defects, resulting in improved application stability
- Collaborated with teams to resolve complex issues, improving overall product quality
- Developed and implemented effective test plans, resulting in reduced testing time and increased efficiency
